

EK Ecoline Product Specialty

EK Ecoline Re-Roofing System EK Ecoline Durability Industrial Door System

Thinking Out of The Box

Providing permanent solution for factory with the most effective solution of not replacing the whole roofing area which will cause shutdown of operation and high cost of replacement.

EK Ecoline Re-roofing Systems provide a cost efficient solution without defecting the operation of the factory and benefits factory from further sound-proofing and better heat insulation

EK Ecoline Heavy Duty (Light Weight) Industrial Door System

We offer superior designs and engineering processes that enhance the functionality, durability and life of our products. All corrosion resistant doors utilize premium materials and manufacturing methods ensuring that every corrosion resistant door system can withstand highly corrosive environments.

EK Ecoline Re-Roofing System

Product Application

- ☼ Chemical Resistant
- ☼ Anti-Corrosion
- ☼ Permanent Protection Membrane
- ☼ Abrasion Resistant
- ☼ Seals & Prevents Cracks
- ☼ Fungus Resistant
- ☼ Environmentally Friendly
- ☼ Zero VOCs, Zero Solvent
- ☼ Custom Colours Available

Benefits of EK Ecoline Industrial Ceiling and Internal Partition Wall

- ☼ Clutters of mechanical systems can be easily hidden inside the space in between the external & internal covering
- ☼ Provide energy efficiency by acting as an double layer insulation with double to effectiveness in providing insulation for the factory. Eliminating the cost of additional heating and/or cooling of plant.
- ☼ Provide superior sound proofing properties for the industries by doubling the naturally noise dampening material
- ☼ Prevents dust build-up on the steel structures in between, minimizing factory structure cleaning cycle by a great scale, increasing production & operation performance.
- ☼ Prevents corrosive fertilizers from sitting on the structure in between the covering, Hence, minimising the corrosion rate, maximising structure protection. At a cost effective way.
- ☼ Prevents direct contact of moisture & chemical from the steel structure within and prevent the cost of repainting of steel structure effectively.

Additional Top Hat Purlin

Preferred Application

- ☼ Fertilizers Compaction Plant
- ☼ Dust borne warehouse
- ☼ Chemical Storage Area
- ☼ Closed Poultry Houses
- ☼ Packaging Rooms
- ☼ Factory Ceiling
- ☼ Chemical Splash Area
- ☼ Aesthetic Improvement
